

The Fastest Link Between Two Points

ZipLine 170

Can't trench cable?

Teletics **ZipLine 170** is the fastest, least expensive way to get **true 170Mbps** high speed ethernet between two locations. No need for expensive trenching of cable, bypassing roads, railway tracks, rivers, tarmacs etc is easy and can be installed in less than 2 hours, everything you need is in the box.

The opportunities for *ZipLine* are endless. Construction sites, security phone applications, parking lots, buildings, recreational properties, fuel depots for credit applications and many more time and money saving opportunities.

Ethernet Speed VoIP Grade Wireless

The **170** offers a complete high performance wireless bridge in a box, instead of trying to trench cable, just put a ZipLine outdoor radio at each end and you're done.

Most wireless Ethernet bridges require software programming for voice over IP (VoIP). Software programming adds to the cost and poor software setup choices can significantly affect VoIP quality.

The **ZipLine 170** comes pre-programmed to sync for the most secure and best Quality of Service (QoS) wireless connection.

ZipLine 170 Advantage

No Trenching

Ideal for temporary or permanent installations.

Fast and Secure

True 170Mbps speed with 256 bit AES encryption. Every system is unique and secure.

No Radio experience needed

Outdoor unit is complete.

Rapid Deployment

Installation in less than 2 hours, everything you need is in the box.

**WHEN WIRES
WON'T
WORK™**

Specifications

ZipLine 170

Radio Range:
3 Miles or 5 Kilometres

Ethernet Port:
RJ45/GigE

Actual sustainable thruput:
up to 170Mbps

Operating Temperature:
-30F to +145F or -35C to +60C
(-40 Version available)

Power Required:
19W maximum, 10W typical

Radio Type:
5.8GHz DSSS, License Free

Encryption:
256 Bit WPA-PSK (AES)

Radio Power:
+40 dBm (adjustable)

Radio Sensitivity:
-80 dBm @ 10-5 BER

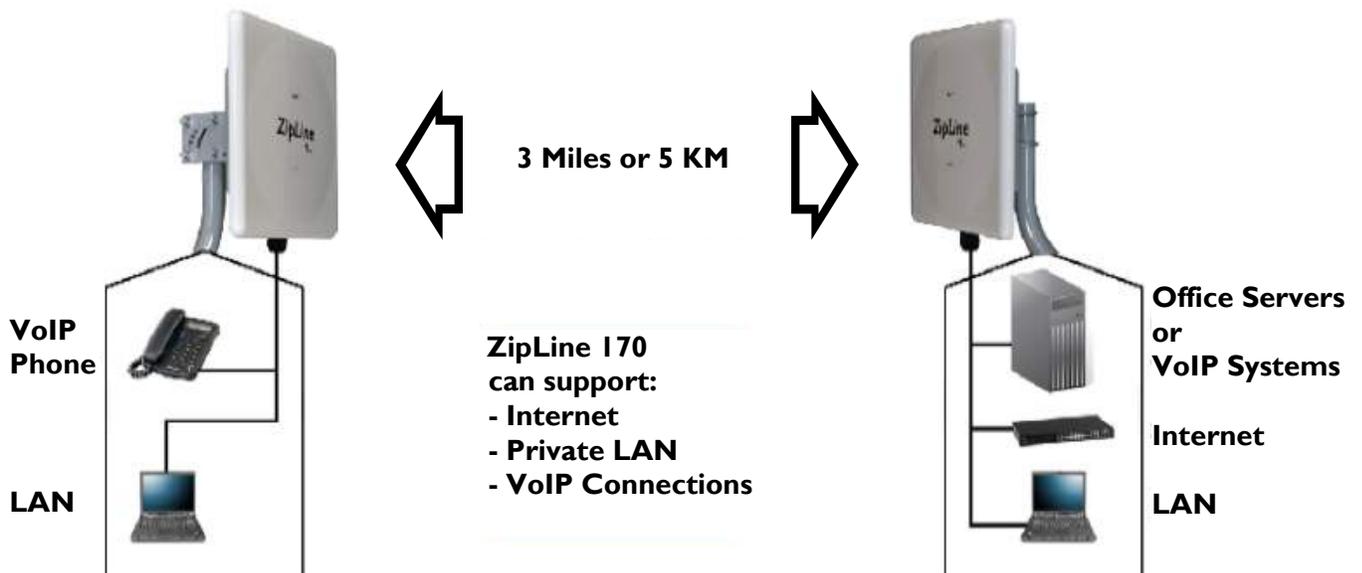

Outdoor Unit Size:
12"x12"x3.5" or
31cm x 31cm x 9cm

Shipping Weight:
23LBS or 10.5KG

Contents:
Ships complete for rapid deployment
